

606 - Communications  
Act

**\*OGC Has Reviewed\***

Item from the Daily Log - 21 March (Friday)

25X1A

[REDACTED] of Communications called to inform me that he was leaving on a sixty-day trip and that in connection with reciprocal communications rights with other countries, his latest information from the Department of State was that negotiations for such rights could be started and that at an appropriate time it would be necessary to inform the Senate that such negotiations were proceeding and either would be Executive Conventions not requiring Senate approval or bilateral agreements which would require Senate approval. State will carry the lead in this matter and [REDACTED] asked me to keep in touch with them. I will do so through Mr. [REDACTED] office. Eventually, over a period of years, this may lead to proposals for amendment of the Communications Act of 1936.
